DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 22 July 2008, with respect to **ALL** claims have been fully considered and are persuasive. The rejection of 23 April 2008 has been withdrawn.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 22-43 and 57-69 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 22-43 and 57-69 fall under the statutory category of a process. Current guidance suggests that a process must be tied to another statutory class (such as a particular apparatus) of transform underlying subject matter (such as an article or materials) to a different state or thing. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps.

Allowable Subject Matter

4. Claims 1-21, 44-56 and 70 are allowed. The following is an examiner's statement of reasons for allowance: Remarks filed 22 July 2008 sufficiently outline the differences between the instant claims and relevant prior art. After further updated search, no other more relevant prior art was found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
